

Impact of Search Listings for Local Businesses

August 2014

Background and Methodology

Google and Ipsos MediaCT partnered to better understand the value to both consumers and small businesses of business listing attributes as they appear in search engine results. Potential listing attributes include business photos, phone number, hours of operation, website and user reviews.

This report explores the path to purchase, shopper attitudes and behavior, as well as impact of complete business listings within Google Search.

1,000 respondents were recruited and completed a 20 minute online survey, which fielded between July 8, 2014 and July 22, 2014.

Respondents met the following criteria for inclusion in this research:

- Ages 18-64
- Have used search to research any purchases in past 6 months
- Made a purchased within a least one category within past 6 months
- Sole or shared decision-maker for the category

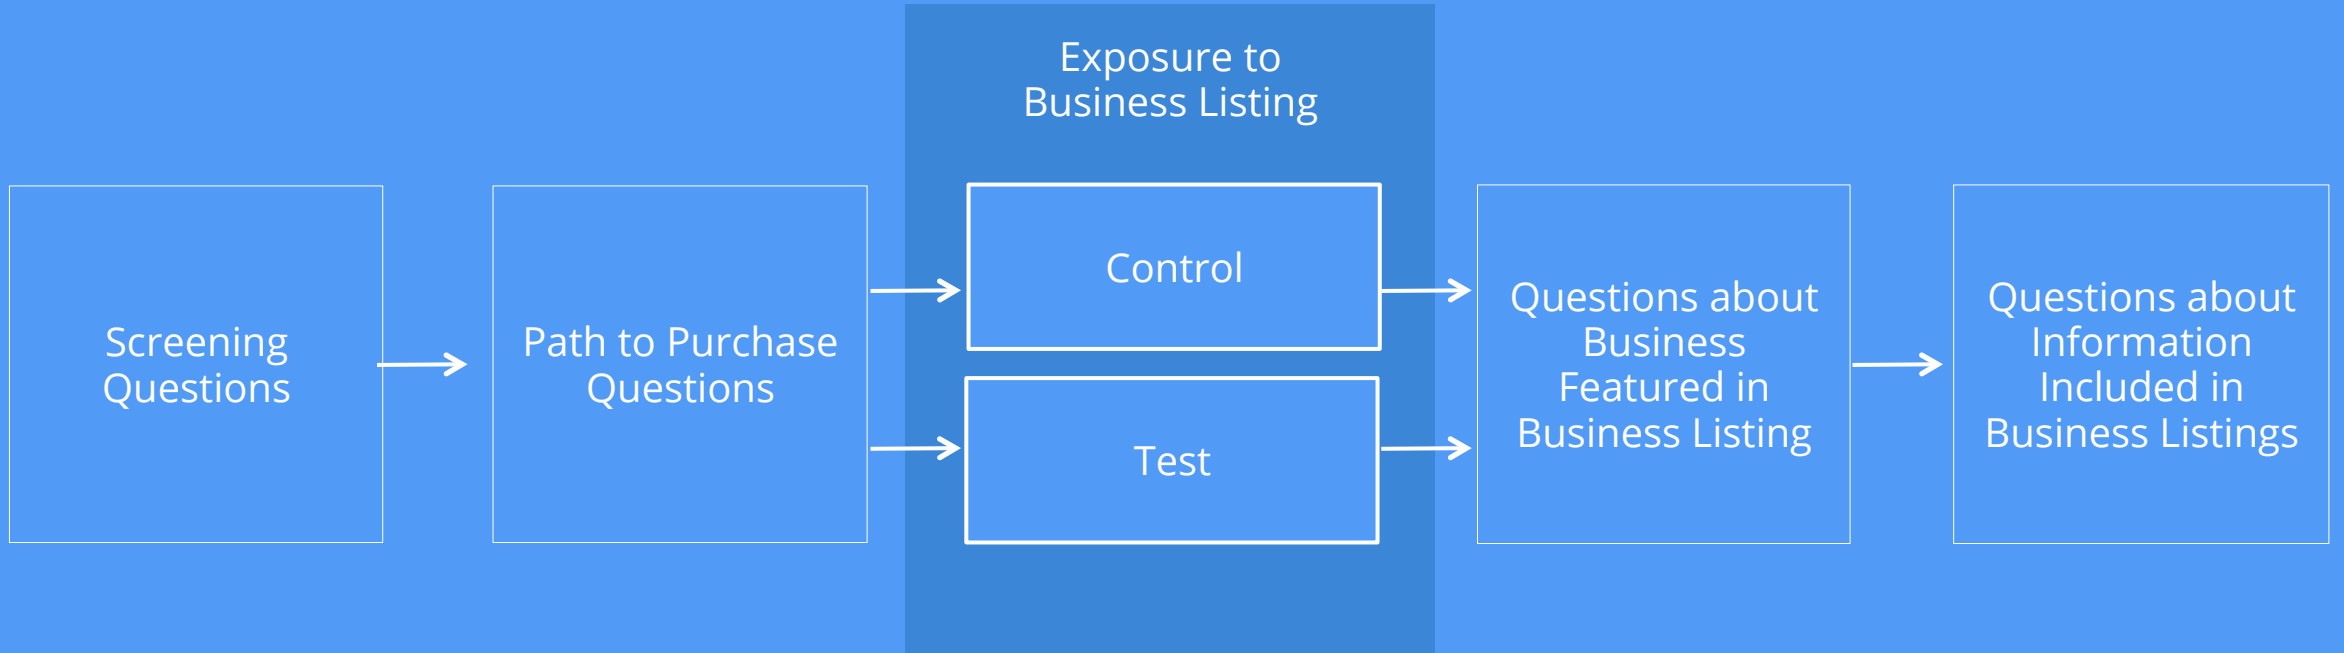

The 5 categories covered by this program are:

- Bakery
- Mechanic
- Salon / Barber shop
- Flower/Plant shop
- Hardware store

Respondents were assigned one of the 5 categories based on natural fallout with a minimum of 100 per category.

Respondents were also exposed, based on random assignment, to one of two Search Engine Results Pages in a “laboratory environment” containing a business listing for the assigned category. Respondents in the control cell saw a listing with minimal information, while respondents in the test cell saw a verified listing for the same business. After exposure to the listing, respondents were asked about their perceptions of the business and expectations for the different types of information provided in the listing.

Research Design and Survey Flow

Convenient hours and location play an important role in the decision to buy locally

Importance of Factors in Selection of Business (Extremely or Very important)

Base: Total Respondents (n=1000)

Q. How important were each of the following factors in selecting a business/store to purchase [CATEGORY] from in the past 6 months?

Note: In stock factor was shown only if bakery, flower, or hardware quota and person availability was shown only if mechanic or salon quota

Consumers rely on WOM and the Internet for information prior to purchase

Base: Total Respondents (n=1000)

Q. Which of the following sources did you use to gather information about [CATEGORY] in the past 6 months? Please think about any information gathering you did about products, services, brands or businesses/stores. Please select all that apply.

Consumers turn to search engines to gather information for local purchases

Online Sources of Information

Consumers rely heavily on search engines early on while gathering information

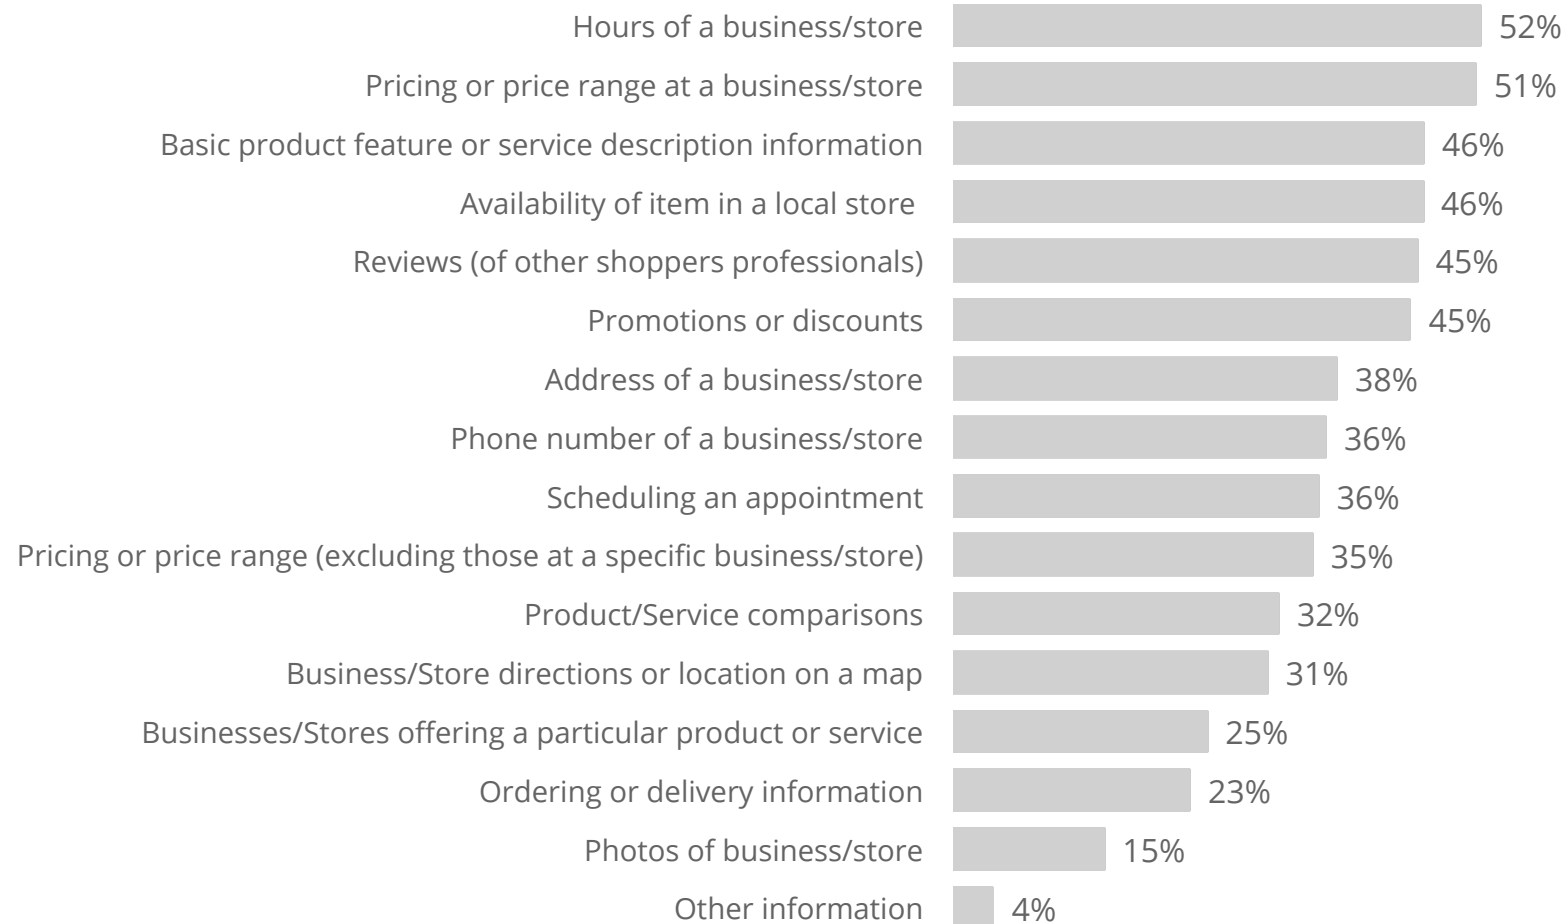

Timing of Usage of Sources

	Beginning	Middle	End
Search engines	83%	29%	10%
Coupon or Daily Deal websites/apps	48%	50%	21%
Social networking websites/apps	47%	45%	23%
Retailer/Business websites/apps	45%	50%	21%
Map websites/apps	44%	38%	31%
Ratings/Review sites/apps	40%	55%	18%

Base: Used Specific Online Sources to Gather Info (floating base)
Q. When during your information gathering process did you use each of these sources? Please select all that apply for each.

Consumers seek out business hours via search engines

Information Sought on Search Engines

Base: Used Search Engines To Gather Info (n=474)

Q. What type(s) of information related to your purchases of [CATEGORY] did you look for using search engines? This can include any information gathered about products, services, brands or businesses/stores. Please select all that apply.

Note: Scheduling an appt. was asked only if mechanic or salon quota and ordering/delivery information was asked only if bakery, flower, or hardware quotas.

Consumers say that search engines help them save time and make decisions

Ways Search Engines Helped

99.6% of those who used search engines to gather information say **search engines helped** them

2 in 3 consumers looked for local business information on map sites/apps

Information Sought on Map Sites/Apps

Base: Used Map Sites/Apps To Gather Info (n=186), Used Map Sites/Apps to Gather the Specific Info (floating base)

Q. What type(s) of information related to your purchases of [CATEGORY] did you search for using map sites/apps? This can include any information gathered about products, services, brands or businesses/stores. Please select all that apply. Q. Thinking about the information you looked for related to, did you find each type of information you were looking for using map sites/apps?

Consumers say that map sites/apps help them save time and prompt in store visits

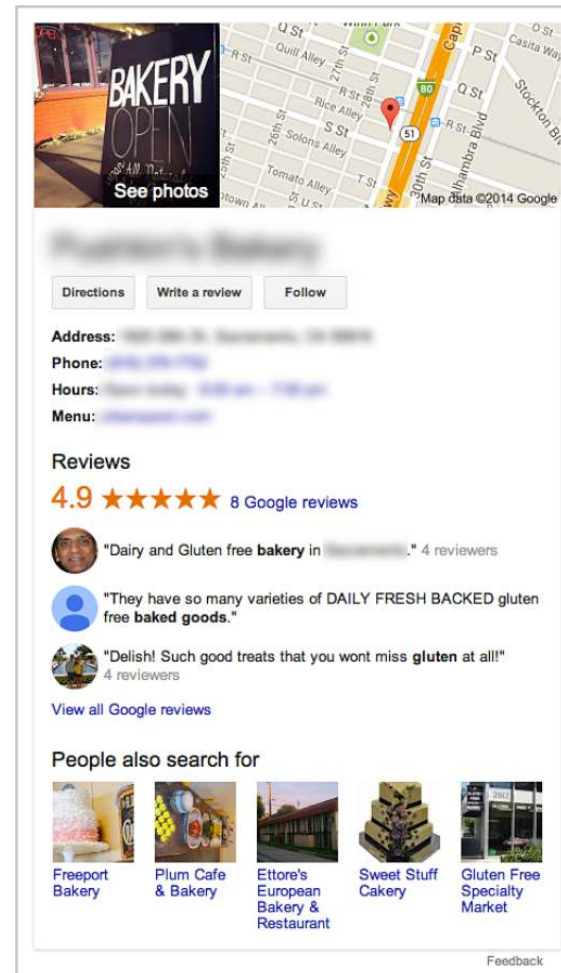

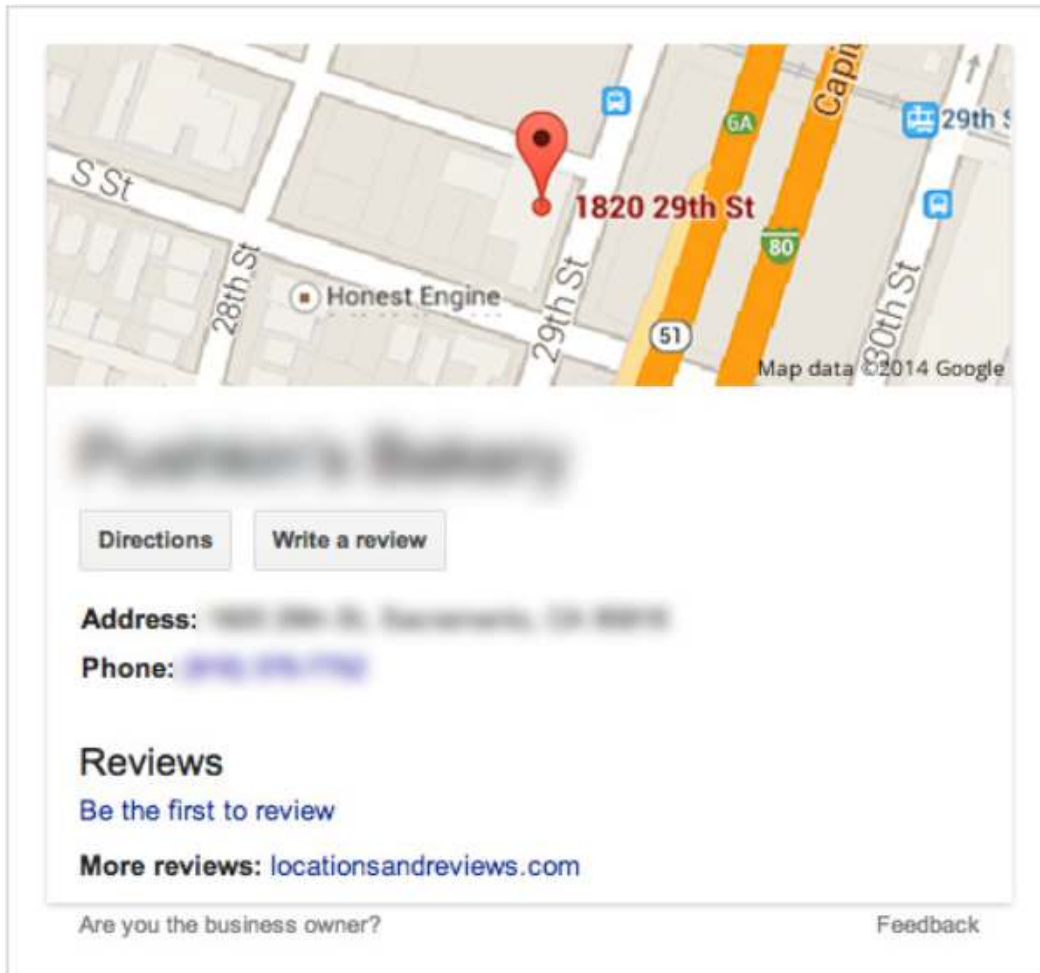

Ways Map Sites/Apps Helped

97% of those who used maps to gather information say **maps helped** them

Base: Used Map Sites/Apps To Gather Info (n=186)
Q. And, how did map sites/apps help you, if at all, while you gathered information about [CATEGORY]? Please select all that apply.

Exposure to Business Listing
